A

A/B TESTING - The method in marketing research to test the effectiveness of marketing strategies. A/B testing starts with a control or initial marketing scenario. The control scenario 'A' is usually defined through several aspects (e.g. cost, color, texture, shape, fonts, site layout, web copy etc). An alternative scenario 'B' is created by changing the defined aspects. Subsequently, the market response from 'A' will be compared to that of 'B'.

ABOVE THE FOLD - The section of a Web page that is visible without scrolling. Ads placed above the fold are assumed to be viewed and clicked more often. Therefore, advertisers often look favorably at placements that are above the fold on a Web page.

AD BLOCKING- The blocking of Web advertisements, typically the image in graphical Web advertisements. There are claims that download time improved considerably by blocking slow-loading banners and buttons. Consequently, ad blocking might actually encourage more aggressive forms of generating revenue. If legitimate Web advertising is eliminated, content sites will feel the pressure to sacrifice editorial integrity by using sneaky advertorials, charge subscription fees for content... or be forced out of business.

AD COPY- The actual text in an advertisement that aims to get your prospective customer's attention and get you more clicks and sales.

AD SPACE- The space on a Web page available for advertisements.

Ad space is now a major factor for sites that are dependent on advertising revenues. One of the challenges of Web design is to use ad space in a way that delivers for advertisers without alienating visitors.

AD TRACKER- A tool or software that you can use to track and measure the ROI (Return On Investment) of your marketing methods including links, pay-per-click campaigns, autoresponders, affiliates, popups, banners, salescopy, articles, reports, ebooks, and even offline ads. Here's an example: <http://www.linktrackr.com/>

ADSENSE - A program by Google that you can use to add advertisements to your websites and make money when visitors to your websites click on the posted advertisements. Sign up at <http://www.google.com/adsense>
Here's a guide for you to master Google AdSense: <http://www.adsense100kblueprint.com/>

ADVERTISERS - People or businesses that place advertisements on publishers' sites to promote their product or service with the intention to get sales or visits.

ADWORDS - A pay-per-click advertising program by Google that you can use to advertise your website and products, and only pay when your advertisement is clicked on. Sign up at <http://adwords.google.com>

AFFILIATE- Someone who gets paid a commission or reward for referring a paying customer to a merchant's site.

AFFILIATE MARKETING- A marketing strategy which involves revenue sharing between online advertisers/merchants and online publishers/salespeople. Compensation is based on performance measures, typically in the form of sales, clicks, registrations, or a hybrid

model. Affiliate merchants are the advertisers/merchants who want to sell their products. Affiliates are the publishers/salespeople who market or promote the products of the affiliate merchants through various methods.

Some examples of affiliate merchants include:

- Amazon.com
- Clickbank.com
- Commission Junction

Here's an excellent course on Affiliate Marketing: <http://www.unstoppableaffiliate.com/>

AFFILIATE SOFTWARE- A software that provides tracking and reporting of commission-triggering actions (sales, registrations, or clicks) from affiliate links.

Affiliate merchants use affiliate software to handle transaction tracking and reporting. These software costs range from free and almost-free scripts to expensive software packages.

ALEXA- A website that rates other websites on the Internet based on their popularity. Available at www.Alexa.com

ALT TEXT- A HTML attribute that provides alternative text when non-textual elements, typically images, cannot be displayed.

ANONYMOUS FTP- An option in FTP that allows users to download files without having to establish an account. Anonymous FTP, sometime shortened to Anon FTP, is often used for large files of public archives.

Apache- An open source web server software. Apache is found primarily on Unix-based operating systems, but is also available for Windows and other platforms.

ARTICLE MARKETING- A type of advertising whereby you submit articles to article directories and include your resource box, so that you can generate free traffic to your website and increase your site's page rank.

Some of the top article directories include [Ezine Articles](#) & [Go Articles](#). Here's an excellent article marketing software: http://www.article-rewriter.info/index_cb.php

AUTORESPONDER- A program that automatically responds via email to people who sign up for your newsletters, ecourses, ezine etc. You can also pre-set the program with several email messages to be sent to your subscribers at predetermined time. An example of a powerful and reliable autoresponder service is Aweber which can be found at <http://www.aweber.com>

B

B2B- Business that sells products or provides services to other businesses.

While business-to-business activity exists both online and offline, the acronym B2B has primarily been used to describe the online variety.

B2C- Business that sells products or provides services to end-user consumers.

While business-to-consumer activity exists both online and offline, the acronym B2C has primarily been used to describe the online variety.

BANDWIDTH- The amount of space allocated to you by your hosting service to be used by visitors to your website. Each visitor to your website uses a number of bytes when they open your webpage, and each month, you only get a fixed number of bytes.

BANNER ADVERTISING- A network of website owners that agree to barter or exchange banner advertisements displayed on their websites using a pre-agreed exchange rate. Here's a really cool course on banner advertising: <http://mediatrafficmeltdown.com/>

BANNER BLINDNESS- The tendency of web visitors to ignore banner ads, even when banners contain information visitors are actively seeking.

BASIC RESELL RIGHTS- These rights allow you to sell the product you purchased to others but those that bought this product from you are not allowed to sell it.

BEYOND THE BANNER- Online advertising which does not involve standard GIF- and JPEG-format banner ads.

Beyond the banner is crucial to create some differentiation in online advertising. This is because banners have become so common that it makes it easy for Web surfers to ignore the banners.

BLOG- A form of online journaling which involves frequent, chronological publication of personal thoughts and Web links. A blog is often a mixture of what is happening in a person's life and what is happening on the Web. Some examples of blogging sites:

- Blogger.com
- Wordpress.org
- Livejournal.com

Blogs are also called web logs or weblogs.

BOOKMARKING- Social bookmarking is a new way to advertise your website by adding a link to your website at social bookmarking sites where people will be able to see them. It is an effective way to get traffic to your website.

BOUNCE RATE- In web analytics, bounce rate is the percentage of visitors who leave after viewing a single page. In email marketing, bounce rate is the percentage of emails in a campaign that are undeliverable. Bounce rate is used to describe the effectiveness or ineffectiveness of a particular web page.

BUM MARKETING- A marketing method coined by Travis Sago that uses article marketing to promote affiliate links and sites. You basically choose an affiliate product, get your affiliate link, write articles to promote it, and then submit the articles.

BUSINESS PLAN- A series of steps listing all your goals and what you need to do to achieve success in your business.

C

CALL TO ACTION (CTA)- A part of the marketing message that attempts to persuade a person to perform a desired action.

A call to action aims to persuade a visitor to perform a certain act immediately. Some common examples of CTAs are "Buy Now!" and "Register Today!" The call to action is intended to improve the market's response rate to the ad copy, as its absence may cause a visitor to forget about the ad and move on to other things.

CACHING- The storage of Web files for a later re-use, at a pace more quickly accessed by the end user.

The objective of caching is to make efficient use of resources and speed up the delivery of content to the end user.

CAPTCHA- abbrev. "Completely Automated Public Turing test to tell Computers and Humans Apart". It is a challenge-response testing system whereby the reader must re-type in a given field, a series of ambiguated characters shown by an image.

CAMPAIGN- All the work involved with promoting and advertising a particular website, product, or service.

CAMTASIA- A popular video-making software that is especially useful for making screen capture videos to show what you are doing on your computer. You can get the software from www.techsmith.com

CLICKBANK- One of the most popular online marketplaces that focuses on and sells digital products such as e-books and software; you can also get affiliate links to these products to promote them and make money. You can check out the site here: <http://www.Clickbank.com>

CLICK-THROUGH RATE (CTR)- The average number of click-throughs per hundred ad impressions, expressed as a percentage.

The CTR may be seen as a measure of the immediate response to an ad, but not the overall response to an ad. This is because visitors may have seen an ad but instead of clicking through, they may go directly to the URL.

CONTEXTUAL ADVERTISING- A method of serving advertisements based on the content (i.e., overall context or theme) of a web page.

Google AdSense was the first advertisement service that introduced the inclusion of a page's overall context in determining which type of ad campaigns will be rolled out for that page.

CONVERSION RATE- It tells you how many visitors to a website actually become customers. For example, if you are getting 1 sale for every 100 visitors to your website, then you have a 1% conversion rate.

COOKIE- Preferences information stored on a user's computer by a Web.

Cookies are passed from a Web server through a Web browser to the user's hard drive. This information is essential for many of the features on the Web, such as shopping carts and personalized portals.

COPYWRITING- The use of words and text to promote a person, business or product. It is commonly used for advertisements and other marketing materials to persuade the reader to act (eg. to buy a product). Here's an excellent course on copywriting:

<http://www.warriorforum.com/warrior-special-offers-forum/381674-warrior-special-offer-day-1-salesletter-1-week-20k-create-cash-grabbing-instant-salesletters-hours.html>

CPANEL- It is the control panel of your website provided by web hosting services that enables you to login and manage your files as well as other information related to your website.

COST-PER-ACTION (CPA)- Online advertising payment model in which payment is based solely on qualifying actions such as sales or registrations.

The actions defined in a cost-per-action agreement relate directly to some type of conversion, such as sales and registrations. This does not include transactions based solely on clicks, which are referred to specifically as cost-per-click or CPC.

Here's a really good course on CPA marketing: <http://www.warriorforum.com/warrior-special-offers-forum/446224-make-least-50-500-per-day.html>

COST PER CLICK (CPC)- The amount of money you have to pay whenever someone clicks on your advertisements, links, or text when you use an ad-buying program.

COST PER THOUSAND IMPRESSIONS (CPM)- The CPM model refers to advertising bought on the basis of impressions.

The total price paid in a CPM deal is calculated by multiplying the CPM rate by the number of CPM units. For example, 100,000 impressions at \$10 CPM equals a \$1,000 total price.

CSS- It is the acronym for Cascading Style Sheets and it is now commonly used to style webpages instead of HTML. A webpage can have many different CSS, each controlling the look of part of the page and one CSS that combines everything and bring the entire webpage together.

D

DATA TRANSFER- The total amount of outbound traffic from a website (excluding email), typically measured in gigabytes (GB).

Data transfer is often confused with another term – bandwidth. The difference between bandwidth and data transfer is that bandwidth is a rate and data transfer is a total.

Note: Many hosts use the terms bandwidth and data transfer interchangeably, referring to a monthly data allowance as bandwidth.

DEDICATED HOSTING- A type of hosting where a portion of space on the hosting company's servers is allocated exclusively to you for your domain or site. Hostgator has reliable dedicated servers and is a great choice for hosting your sites. Sign up for Hostgator here: <http://www.hostgator.com>

DEDICATED IP- An IP address dedicated to a single website.

Dedicated IP addresses are mainly needed for SSL. To avoid the risk of being caught up in an IP ban, search engine optimizers tend to prefer dedicated IPs. Regardless of whether this is a real or perceived risk, many webmasters would rather be safe than sorry.

DEEP LINKING- Linking to a web page other than a site's home page.

Some argue that deep linking unfairly eliminates the ability of the home page to contribute to brand building and ad serving functions.

DIRECT LINKING- It means placing a link for an affiliate program in an advertisement, article, or some other form of advertisement leading visitors to the merchant's site. This is not as effective as leading visitors to a intermediary landing page that pre-sells the affiliate product.

DIRECTORY- A web directory groups links to websites into categories and displays them, making it easy for people to find websites that interest them. Placing a link to your website at web directories is also a way to get back links.

DOMAIN NAMES- It is the name of your website and is made up of a series of alphanumeric strings separated by periods. Example of domain names are: internetmarketing.com, internetmarketing.net, internetmarketing.org... You can register for a domain name at www.Namecheap.com or www.Godaddy.com

DOORWAY PAGE- A web page made specifically to rank well in search engines for particular keywords. It serves as an entry point through which visitors pass to the main content.

E

E-COURSE- A series of online lessons or e-mails that teaches or provides you with information on a specific topic. In other words, it's a course that is conducted over the Internet.

EMAIL MARKETING- A form of marketing whereby you use email to send salesletters

and newsletters to your subscribers/customers to promote a service or product. It is now commonly used in home-based business and commercial industries because it is much more cost-effective compared to traditional printed direct mail, and also because subscribers can instantly receive the emails. Here's an excellent email marketing course: <http://www.timbekker.com/strippededition.php>

EXCLUSIVITY- The contract term in which one party agrees to grant another party sole rights with regard to a particular business function.

This is often seen in some advertising networks which demand exclusivity. Others which do not demand exclusivity offer a higher rate for an exclusive deal than the standard rate given to non-exclusive deals.

EZINE- It means electronic magazine and is basically an online magazine.

EZINE DIRECTORY- Directory of electronic magazines, typically of the email variety. Ezine directories are like catalogues that list the different available electronic magazines online. They often organized into high-level categories similar to other general Web directories. Once you find the ezine directory best suited to your needs, don't let it go. Here's the biggest source of ezine directory: <http://www.directoryofezines.com/>

F

FACEBOOK- A social networking site located at facebook.com.

Facebook is the largest social networking site in the world, with 750+ million active users as of July 2011. Following its rise to popularity, marketers can utilize this site to reach people by using direct Facebook advertising or by non-advertising avenues (social media marketing and/or content marketing).

Here's an excellent script for Facebook marketing: <http://doubleyourlikes.com/>

FANTASTICO- A script installer that is run on many web hosting accounts and usually accessible from cPanel. It enables you to easily install blogging, content, carts and other popular scripts on your website, by only clicking a button.

FAVICON- A small icon (typically a logo) that is used by some browsers to identify a bookmarked Web site.

Favicons are most used by large, well-branded sites such as portals and media companies. These little custom icons are used to make a website bookmark more prominent in a long bookmark list.

The display size of a favicon in the Favorites list is 16x16. Files are recognized by the ".ico" extension.

FLASH- A popular way to add content to a websites as the pictures, graphics and words are often moving and colorful, making them interactive and also visually interesting for visitors.

FORUM- An online meeting place for people with common interests to exchange views and ideas on a particular topic.

FORWARDING- Resending an e-mail from your e-mail inbox to another email address.

FRAMES- A structure that allows for the dividing of a Web page into two or more independent parts.

Frames are often used to keep one or more parts of a Web page static while another part of the page is scrolled or loaded. Benefits can include faster page loading and the ability to keep a navigation bar present on the visible part of the page.

FREQUENCY CAP- Restriction on the amount of times a specific visitor is shown a particular advertisement.

Frequency capping is used to avoid banner burnout so that visitors are not being overexposed causing response to drop. This method is effective for campaigns of a direct-response nature measured by click-throughs. However, it defeats the purpose of campaigns targeting to build a website's/company's branding.

FTP (FILE TRANSFER PROTOCOL)- A way of transferring files from your computer to your website or vice versa. You usually have to use some kind of software such [SmartFTP](#), a free FTP software, to do it.

G

GEO TARGETING- A method of detecting a website visitor's location to serve location-based content or advertisements.

A website visitor's location can be detected by the computer's IP address. The first three digits of an IP address corresponds to a country code, while the succeeding digits often refer to specific areas within that domain.

GIVE AWAY RIGHTS- These rights enable you to give the product away for free.

GOOGLE CHECKOUT- An online payment system powered by Google.

Google checkout enables users to save their credit card information in their Google account so that they can quickly perform online purchases in participating sites, without needing to manually enter credit card information every time.

GOOGLE INSTANT- A feature of Google's search engine that shows instant search results as the keyword query is being typed.

For search marketers, Google Instant has the potential to funnel more traffic towards phrases suggested by the system, and short-circuit some of the natural long-tail search

activity.

GUERRILLA MARKETING- A form of online marketing using unconventional methods and is sometimes viewed as unethical because of certain techniques used. It aims to get the greatest possible profits from the most minimal amount of resources.

GUEST BLOGGING- Writing a blog post to be published on another blog as a temporary featured author.

GURU- A person that is an expert in a certain area or has had remarkable success in that area, and uses their knowledge to guide others.

H

HEATMAP- A graphical representation of data where varying degrees of a single metric are shown using colors.

A very powerful tool when preparing website navigation and sales copy, heatmaps are often used by online marketers to evaluate the most-used parts of a web page. It can be via eyetracking, clicktracking, mousetracking, etc. Results of most viewed parts of the page are often displayed with dark red, with less viewed parts displayed as lighter red, orange, yellow, etc. Here's a plugin which tracks the heat map of Wordpress sites:

<http://clickheatdynamo.com/>

HITS- The number of file requests for your website where even images and index page also count as single hits. It is not a good way to measure the amount of traffic to your website.

HOME PAGE- The main page of a Web site.

The home page can be said to be the most important page of a Web site. This is because visitors who arrive at a slow-loading or poorly-designed home page may not view the rest of the site. They might even decide to avoid the site in the future. Therefore, home pages should be designed intricately to be fast-loading and intuitive.

HOSTING- An online place that holds all the files for your websites as well as provides you with bandwidth, the amount of space that you can use, and database accounts. You can get cheap and reliable hosting at www.Hostagator.com

HTML- It is the acronym for Hypertext Markup Language and is the code used to define webpages. You can use it to define the look of text, buttons, banners, and other components of your webpages.

HYBRID MODEL- A combination of two or more online marketing payment models. A hybrid campaign might be a mix of CPM, CPC and CPA; or a mix of CPC and CPA models. Hybrid deals are sometimes seen as a way to further split the risk between publishers and advertisers.

I

IM- It is the acronym for Internet Marketing and means marketing products or services online to make money.

IMPRESSION- It is the number of times your link appears on another website and is often used in Adwords to show how many times your ads are displayed.

INBOUND LINK- A link that directs people to your website.

INCENTIVIZED TRAFFIC- Visitors who have received some form of compensation for visiting a site.

Incentivized visitors typically do only what is necessary to gain the incentive and nothing more. Incentives may come in the form of cash, points, or other means. While incentivized clicks/traffic is the most notable incentive-based action, other forms exist such as incentivized registrations.

INBOUND MARKETING- A marketing model whose sales performance relies on the initiative of its client base to find and purchase a product.

Inbound marketing is best described as a passive sales model. Unlike outbound marketing, a buyer should make the "first move" before any promotional tactics are used.

INTERSTITIAL- An advertisement that loads between two content pages.

Interstitials are a form of interruption marketing. One of the most common interstitials is the pop-up ad. Another emerging format is a full-page ad that interrupts sequential content, forcing exposure to the advertisement before visitors can continue on their content path.

J

JAVASCRIPT- A type of programming language used in web pages to give it interactive components and it is usually shorter and more powerful than coding only in HTML.

Tip: JavaScript is good if you want shorter code but when Google ranks your website, it will not be able to read it as content.

JOINT VENTURE (JV)- It means working together with another marketer to make

money. Both parties make certain agreements and follow them through till the end of the agreement term.

K

KEYWORD DENSITY- Keyword density is the percentage of times a keyword or phrase appears on a web page compared to the total number of words on the page. In the context of search engine optimization, keyword density can be used as a factor in determining whether a web page is relevant to a specified keyword or keyword phrase.

KEYWORD RESEARCH- The act of finding keywords that are searched for often in search engines but have little competition. Here's a superb keyword research software:
<http://www.micronichefinder.com/>

KEYWORDS- The word or phrase that you are trying to target for a particular website, web page, or article, and it is also the actual word or phrase people type into search engines. An example is "dog training".

KEYWORD MARKETING- A form of marketing involving putting your message in front of people who are searching using particular keywords and phrases. For ad buyers, keyword marketing involves purchasing ad units, typically banners, on the search results page when a Web surfer searches for particular keywords and phrases. For search engine optimization professionals, keyword marketing involves achieving top placement in the actual search listings.

KEYWORD STUFFING- The excessive, unnatural use of keywords on a web page for search engine optimization purposes.

KEYWORDS TAG- META tag used to help define the primary keywords of a Web page. The keywords tag belongs in the <HEAD> section of a Web page, typically placed below the META description tag. Keyword tags are additional information to the website content. Do not use any keyword excessively, as search engines will perceive this as spamming. Also, keep the keywords and phrases relevant to the actual text of the page.

L

LANDING PAGE- The page between your advertisement or article and your merchant's website. This page usually contains a review of the merchant's products or a testimonial for the merchant.

LINK EXCHANGE- It means swapping your link with others. They then display your link on their sites, and you post their link on your website.

LIKE-GATE- A barrier requiring a user to "Like" a brand's page before they can access certain content from that brand on Facebook.

Like-gating is a marketing effort by brands on Facebook to increase their Fans more quickly than they would otherwise. Marketers use great offers to persuade people into becoming fans on a Facebook fan page. This concept is similar to "email subscribers" and "permission marketing".

LINK BUILDING- The process of increasing the number of inbound links to a website in a way that will increase search engine rankings.

Link building is a process to improve a page's search ranking for a given keyword or keywords. A page's rank (generally) improves by increasing the number of incoming links, whose corresponding anchor text is relevant to the targeted keyword(s). To more about

the various link building methods, check out: <http://www.InstantSEOMastery.com>

LINK CHECKER- Tool used to check for broken hyperlinks.

Link checking is one aspect of site management -- the regular maintenance necessary to keep a site up-to-date.

A "broken hyperlink" refers to a link that does not correctly point to the intended destination page. A hyperlink is "broken" when the destination page is deleted or moved to another location.

LINK POPULARITY- A measure of the quantity and quality of sites that link to your site. Link popularity is under the off-page criteria of search engine optimization. It is used to determine quality content. Off-page criteria of search engine optimization adds the aspect of impartiality to search engine rankings, as citations from other authors in the Web community helps define a site's reputation. In theory, great sites will naturally attract many links, and content-poor sites will have difficulty attracting any links.

LINKBAIT- A piece of content deliberately created with the primary purpose of attracting inbound links.

In the earlier days of the web, site owners noticed that certain types of content generated an inordinate amount of inbound links, especially from the blogosphere and influential sites like Digg. That gave rise to a flood of content that was increasingly formulaic, the most blatant of which spurred the name linkbait.

LINKEDIN – LinkedIn.com is a business-related social networking site. Founded in December 2002 and launched in May 2003, it is mainly used for professional networking. As of 22 March 2011, LinkedIn reports more than 120 million registered users, spanning more than 200 countries and territories worldwide. Here's a course for you to master LinkedIn marketing: <http://linkedinfluence.com/>

LINKROT- When Web pages previously accessible at a particular URL are no longer reachable at that URL due to movement or deletion of the pages. (broken links)

LIST- In email marketing, it refers to a database of people who are interested in your market or niche and have signed up with you. The information is usually stored in your autoresponder service.

LIST BUILDING – the process of adding subscribers/customers to your database. Here's an excellent course on profitable list building: <http://www.profitablelistmastery.com>

LOG FILE- File that records the activity on a Web server.

Log files generate information such as which files are requested, when files are requested, who requested them, and where they were referred from.

M

MANUAL SUBMISSION- Adding a URL to the search engines individually by hand.

Manual search engine submission may be more time consuming than automated search engine submission, but a fair amount of optimization specialists stick with the "old fashioned way."

MARKETING PLAN- The part of the business plan outlining the marketing strategy for a product or service.

The marketing plan includes information such as the product or service offered, pricing, target market, competitors, marketing budget and promotional mix.

There is off-the-shelf software to guide entrepreneurs through the formulation of a

business plan. Some sites also offer sample business plans to emulate for added guidance.

MAILING LIST- A group of all the people who have willingly given to you their email address, and you can at any time send emails to these group of people telling them about products and services you are promoting.

MERCHANT- The seller of a product or service, and you are trying to get people to buy from the seller so you can make money.

META SEARCH ENGINE- A search engine that displays results from multiple search engines. Not all search engines are metasearch engines. In non-metasearch engines, there may be primary listings and secondary listings. The secondary listings serve as a backup to enhance the search coverage... or as a premium (paid) service to enhance the search engine's revenue. These additional listings may or may not be clearly distinguished as being outside the primary results.

META TAG- A part of your HTML code contains information describing your web page, and this part of the code is often displayed in search engine results.

MINI-SITES- They are something like landing pages but contain more information about the product, service, niche, or merchant at the site. You would typically have about 4-5 pages of related information and this increases the amount of information you have for Google to scan, which might result in a higher Page Rank for your site.

MODERATOR- In a forum, specific people are given the power to watch over and regulate what other people at the forum post, and if something breaks the predefined forum rules, a moderator can delete the post and/or ban the person who posted the content from the forum.

MOUSETRAPPING- The use of browser tricks in an effort to keep a visitor captive at a site, often by disabling the "Back" button or generated repeated pop-up windows.

Mousetrapping is one of the most extreme marketing tactics on the Web. The goal is to extract maximum value from one-time visits, typically by bombarding visitors with a never-ending supply of traffic-exchange banners and pay-per-click links.

Master Resell Rights (MRR)- These rights allow you to sell the product and also give the person who bought the product its resell rights. This means that the person you sell to can also sell the product if you allow them to do so. For an excellent source of MRR products, check out <http://www.PLRWholesaler.com>

MYSQL- An online database that is included with your web hosting package. It gives you the ability to maintain a database through your web host storing information such as customer logins, the way they like their web pages to be displayed, etc.

N

NAVIGATION- That which facilitates movement from one Web page to another Web page.

Clear and user-friendly navigation is often taken for granted, but it plays a crucial role in getting site visitors to view more than just the home page. If navigation choices are unclear, visitors may elect to hit the "Back" button on their first (and final) visit to a Web site. Once they enter, the real challenge begins, as it is no easy task to allow first-time visitors to get take maximum advantage of a site.

NETIQUETTE- Short for network etiquette, the code of conduct regarding acceptable online behavior.

NEWBIES- This refers to people who are new or inexperienced at something.

NEWSLETTER- This is an online publication that you email to a list of people who signed up for it. It can contain information related to the reason why they signed up for it.

NICHE- A specialized subset of a market comprising of a group of people with interest in a specific area that you want to target and promote to. An example would be:

NICHE RESEARCH – The process of researching profitable niches to market to. Here's an excellent course on Niche Research: <http://www.nicheresearchmastery.com>

O

OPTIN- This is when a person signs up to be in your mailing list. Double opt in is when the person will have to confirm his subscription through e-mail as well.

Tip- Double opt in helps you ensure that your subscriber provided a working email.

OPT-OUT- (1) type of program that assumes inclusion unless stated otherwise. (2) to remove oneself from an opt-out program.

Opt-out is sometimes used to refer to email which assumes inclusion; sometimes having "Yes" automatically checked on a signup form, sometimes by adding your name directly to a list. (Although in the latter case the term email spam is often used.)

The terms opt-out and unsubscribe have subtly different, yet related, meanings. You unsubscribe to something to which you had previously subscribed. You may opt-out of something you never joined in the first place.

ORGANIC SEARCH- The unpaid entries in a search engine results page that were

derived based on their contents' relevance to the keyword query versus all the other indexed content on the web. With the introduction of features like Google OneBox & Universal Search, the organic search results are not as simple as ten ordered text listings. Now the free side includes things like videos, images and product listings, giving site owners multiple opportunities to get more "organic" exposure.

OUTBOUND LINK- A link to a site outside of your site.

Outbound links send visitors away from your web site. Attitudes towards outbound links vary considerably among site owners. Some site owners still link freely. Some refuse to link at all, and some provide links that open in a new browser window.

The con of outbound linking is that it risks losing time and money from site visitors. This can be a large risk if a site is facing high customer acquisition costs.

OUTSOURCING- Getting other people and paying them to do work such as writing your web pages, articles, ads, and sales pages for you. You can also get them to do any other things that you think it is easier to pay others to do than doing it yourself.

Useful outsourcing sites: <http://www.elance.com>, <http://www.guru.com>, <http://www.scriptlance.com>

Here's a really useful outsourcing course: <http://www.warriorforum.com/warrior-special-offers-forum/373123-how-i-build-instant-crew-outsourcers-minutes-without-fiverr.html>

P

PAGE VIEW- Request to load a single HTML page.

Page views are only important to the degree they play a part in a site's revenue model. If a site earns much of its revenue from advertising, then page views are important because of their contribution to ad inventory. If a site only earns revenue on sales, then page views are not a key statistic. Page views without corresponding sales may even be viewed

as an expense.

PAGEJACKING- Theft of a page from the original site and publication of a copy (or near-copy) at another site. Pagejacking does not mean taking over a page on the original site. In fact, the original site can be completely unaware that the theft has occurred.

PAY PER SALE (PPS)- Online advertising payment model in which payment is based solely on qualifying sales. Advertiser only pays when sales are generated by the destination site based on an agreed upon commission rate.

PAYPAL- A service that allows any individual or business with an email address to send and receive payments online securely, easily and quickly. It supports 190 countries and regions around the world. You can visit its website here: www.Paypal.com

PAGE LOADS - It is the number of times your page has been accessed and is a popular way of counting the number of people that visited your site, but it is not as good a way as counting the number of unique visitors.

PARALYZATION- It is something which is experienced by most newbies and is something like information overload. It means that you have read so much information that you do not know where to start and what to do next.

Tip- All you need to do to get over your paralyzation is to focus and choose to do one thing at a time.

PAYMENT THRESHOLD- Many websites that pay you commission or a fixed fee enforce this and it is the minimum amount of money that you have to earn from them before you will get the actual money.

PDF- It is an acronym for Portable Document Format and it is a file format by Adobe. This is the most popular file format used for ebooks.

PHP- It is a scripting language that is mainly used to create dynamic web pages, allowing you to add different interactive elements on your website. It is mostly used on Linux servers or hosting servers.

PLR- It is the acronym for Private Label Rights and it means you can sell, modify, split up, and/or put your own name and links in the product unless stated otherwise. Here's an excellent course on making money with PLR products:

<http://www.AcceleratedPLRProfits.com>

PRIVATE MESSA (PM)- These are little messages that you can receive or send to other people in forums or using other applications. It is something like an email between you and the other person without both of you having to actually exchange email addresses.

PODCAST- A series of audio or video files that are syndicated over the Internet and stored on client computing devices for later playback.

POP-UNDER AD- An ad that displays in a new browser window behind the current browser window. The pop-under ad is the sneakier relative of the pop-up ad. While pop-up ads are often shown (and closed) instantly, pop-under ads linger behind the current browser window, appearing only after other windows have been closed.

POP-UP AD- An ad that displays in a new browser window.

Pop up windows come in many different shapes and sizes, typically in a scaled-down browser window with only the Close, Minimize and Maximize commands. Here's an excellent script for generating popup ads: <http://www.popupdomination.com/affiliate>

PORTAL- A site featuring a suite of commonly used services, serving as a starting point and frequent gateway to the Web (Web portal) or a niche topic (vertical portal).

PAY PER CLICK (PPC) — This refers to a payment scheme where you have to pay whenever someone clicks on your ads, or links.

PAY PER LEAD (PPL) – This refers to a payment scheme where you pay someone or a company whenever a lead is generated for you.

PAGE RANK (PR)- This is a number assigned to your page by Google search engine and it is a measure of its importance on the Internet. Check your page rank here:

<http://www.prchecker.info/>

PRE-SELL- Pre-selling means you giving a personal review or testimonial for a product or merchant. By doing so, you are telling potential customers more about the product, its good and bad, and so remove any doubts they have before directing them to the merchant's site.

PRESS RELEASE- It is an announcement to the public with respects to the who, what, where, when and why of a topic. It can include things like what is new, what is going to happen, etc. An example PR site – www.PRWeb.com

PUBLISHERS- These are people who allow advertisers to place advertisements and links on their web pages, and in return for it, they get paid by the advertisers.

R

RECIPROCAL LINKS- These are the links that you have that points back to directories or any other sites, in return for them displaying a link to your website on their sites.

REDIRECTING- It means automatically transferring visitors from one site to another site. Usually you transfer people from a site with a shorter URL to one with a longer URL so that visitors only need to type a shorter address to get to your site and can remember it better.

Tip- This is the code of a redirect link:

```
<head>  
<meta HTTP-EQUIV="REFRESH" content="0;  
url=http://www.whereyouwantthemtogo.com/">  
</head>
```

RESELL RIGHTS- These rights allow you to sell the product but you can pass the sell rights to customers. This means that the person who bought the product from you cannot sell it.

RESOURCE (BIO) BOX- A small area of text that you get when submitting articles which is used to place details about you, your website or product.

Tip: The more interesting you make your bio box, the more likely people will click the link to visit your site.

RETURN DAYS - The number of days an affiliate can earn commission on a conversion (sale or lead) by a referred visitor.

If an affiliate program offers 45 return days, commissions are earned for conversions completed any time within 45 days of the initial click-through on the affiliate link. The visitor may later go directly to the merchant's site and not visit the affiliate's site again, as software is used to track the visitor's origin.

RSS- Acronym for Really Simple Syndication. It is a feed of posts or information at your site. When someone signs up to get it, they receive notification via their reader whenever

your site is updated with new content. Here's a plugin that explodes the power of RSS:
<http://relatedrssplugin.com/>

RUN-OF-SITE- Ad buying option in which ad placements may appear on any pages of a target site.

S

SALES COPY- It is the information written on your sales page aimed at getting visitors attention and eventually for them to purchase your product or service.

SALES LETTER- It is a letter to the customer aimed at getting them to purchase your product or service. It can contain information such as product description, benefits, price, testimonials, etc. Otherwise known as sales page or sales copy.

SCRIPTS- Small portions of code that allow web browsers to perform interactive and dynamic tasks such as allowing you to move widgets, enabling you to add items to shopping cart, countdown product quantity, and many more.

SEARCH ENGINE- A program that indexes documents, then attempts to match documents relevant to a user's search requests.

A search engine powers the search process and provides results for a search destination. Web search engines attempt to index a large portion of pages on the World Wide Web. Other search engines are topic-specific, region-specific, and even site-specific.

SEARCH ENGINE OPTIMIZATION (SEO)- The process of designing, building, and promoting a website with the search engines in mind.. Here's a really good SEO course:

SERPs-It is the acronym for Search Engine Results Page, and it is the page that is returned when you search for a keyword in search engines. The page displays all the results returned for your keyword.

SEARCH ENGINE SUBMISSION- The act of supplying a URL to a search engine in an attempt to make a search engine aware of a site or page. When submitting to search engines, sometimes additional contact information, including name and/or email address is needed for consideration.

SEARCH RETARGETING- The use of a site visitor's search history as a basis for the ads that the visitor will see. For example, suppose a search engine user regularly searches for terms like "clean", "energy" and "environment" for a couple of hours. With this data, ad providers like Google AdWords or Yahoo! Marketing can serve ads about sustainable living and environmental protection.

SERVER- A computer or computer program that manages access to shared resources in a network of computers.

SEARCH SPY- A perpetually refreshing page that provides a real-time view of actual Web searches. While not as immediately useful as keyword databases that summarize monthly totals, search engine spies can give insight into how people actually search. Search engine spies come in filtered and unfiltered varieties.

SKYSCRAPER AD- An online ad significantly taller than the 120x240 vertical banners. Skyscraper ads are tall with standard sizes of 120x600. The wide skyscraper is 160x600. These types of ads are often called skyscraper banners, although some examples have mimicked the look of a banner by using a combination of ad buttons

SHARED HOSTING- It means that all the websites are located on one server and each has a different part in the server so that they are separated.

SHOPPING CART- Software used to make a site's product catalogue available for online ordering, whereby visitors may select, view, add/delete, and purchase merchandise. Shopping carts are available as standalone software or as part of hosted storefronts. Here's an example of a shopping cart: <http://www.2checkout.com/>

SIGNATURE (SIG)- Usually in forums and e-mail, you can insert your own signature at the end of the message. You can place information to promote your product, website, or any other information that is within the forum rules.

SITE BUILDER- It is a software that you can use to easily create your website instead of coding it with HTML from scratch. You can use the software to help link all your web pages, add images and text to your content, and many more.

SITE SEARCH- Search functionality specific to one site.

Site search can make or break the user experience. Great search results can help win long-time visitors. Poor search results ("no records found" or "every record found") risk losing visitors forever.

SOCIAL BOOKMARKING- Social bookmarking is a new way to advertise your website by adding a link to your website at social bookmarking sites where people will be able to see them. It is an effective way to get traffic to your website. Here's an excellent social bookmarking software: <http://bookmarkingdemon.com/>

SPAMMING- This means sending unsolicited emails to a large number of people. Another form of spamming is when you post a large number of unrelated messages at forums just

for getting traffic to your website.

SPLASH PAGE- A branding page before the home page of a Web site.

Splash pages are usually graphic-intensive pages that appear before the main home page. Some feature standard graphic format such as GIF and JPEG; others feature formats such as Macromedia Flash that require a special plug-in (which a visitor must download if he or she does not already have one).

SQUEEZE PAGE- A web page specially designed to obtain the email address of visitors.

To do so, you can offer people a free gift, discount, etc so that they will sign up and give you their email address.

STICKINESS- The amount of time spent at a site over a given time period.

Stickiness is often measured in the average minutes per month visitors spend at a site or network. Sometimes stickiness is measured in terms of page views.

When defined as minutes per month, site stickiness is a function of number of visits (repeat usage) and time spent per visit (session stickiness).

SUBDOMAINS- These are websites that are part of your main website. For example, in the domain imlovebirds.com a subdomain could be blog.imlovebirds.com

SURROUND SESSION- Advertising sequence in which a visitor receives ads from one advertiser throughout an entire site visit.

SUPER AFFILIATE- An affiliate capable of generating a significant percentage of an affiliate program's activity. A super affiliate might account for more results than hundreds or thousands of smaller affiliates combined. Partnering with a super affiliate allows affiliate managers to spend less time on administrative duties and more time on generating results. Here's a guide that trains you to be a super affiliate:

<http://superaffiliatehandbook.com/>

T

TEMPLATE- A predefined file that contains common images or headers that are required for a website or advertisement, which you can just use by adding in your own details. This way, you do not have to create everything from scratch each time you need to create a similar website or advertisement.

TEXT AD- Advertisement using text-based hyperlinks.

Text-based ads, although common in email, have been dominated on the Web by their graphical-based counterparts.

TEXT LINK EXCHANGE- Network where participating sites display text ads in exchange for credits which are converted (using a predetermined exchange rate) into ads to be displayed on other sites.

TITLE TAG- HTML tag used to define the text in the top line of a Web browser, also used by many search engines as the title of search listings.

A title tag belongs in the <HEAD> section of a Web page, above the <BODY> section.

TRACKING CODE- Many affiliate programs use this to relate sales to the affiliate marketer. They do so by putting small pieces of code in an affiliate link so that they know who to credit the sale to when purchase are made via that link.

TRAFFIC- It is the amount of visitors to your website. Driving traffic means actively finding ways to get more visitors to a website. The more visitors you get, the more sales you are likely to have. Here's a massive traffic generation course which you should check out: <http://www.warriorforum.com/warrior-special-offers-forum/414215-1-000-2-000-5->

000-day-how-much-you-want-your-search-buyer-traffic-ends-here.html

TRUE COMPETITION- The actual competition your website faces. To find out your true competition, search with quotes around your target keywords and the results returned are those websites that target exactly the same keywords as you do.

TURNKEY SITES- These are websites that have everything set up for you. All the text, images, tables, headers, and links are already set up at the website and ready for you to use. You just need to get traffic and also may have to add your own tracking code to the links.

TWITTER – Twitter.com is an online social networking and microblogging service that enables its users to send and read text-based posts of up to 140 characters, informally known as "tweets", and images. Here's a program that puts your Twitter marketing on steroids! <http://twittenator.com>

TWO-TIER AFFILIATE PROGRAM- Affiliate program structure whereby affiliates earn commissions on their conversions as well as conversions of webmasters they refer to the program.

U

UNIQUE VISITORS- It is the number of different people to your website. The people are identified by their IP, which is their Internet address. You can use a tool to find out how many unique IPs there are to your website and can also customize how often the unique IPs are counted.

UNDERDELIVERY- Delivery of less impressions, visitors, or conversions than contracted for a specified period of time.

Underdelivery can occur for a variety of reasons. A site or network may experience an unexpected drop in traffic. Low CPM campaigns may be bumped for high CPM campaigns.

URL- Location of a resource on the Internet.

A URL, short for universal resource locator, includes the protocol (ex. HTTP, FTP), the domain name (or IP address), and additional path information (folder/file).

An example URL: <http://www.google.com>

USABILITY- The ease with which visitors are able to use a Web site.

Web site usability is about how quickly and easily visitors are able to make use of the site. Usability is a concern for marketers because of its potential impact, positive or negative, on marketing metrics such as conversion rates, which in turn affect profitability.

V

VIRAL MARKETING- A marketing method that depends on people to share information promoting a product or service to all of their friends quickly. Here's an excellent viral marketing software: <http://www.viralgate.com/cb/cb.html>

VERTICAL BANNER- A banner ad measuring 120 pixels wide and 240 pixels tall. According to the IAB (Interactive Advertising Bureau), vertical banner specifically refers to a banner ad measuring 120x240. Technically, there are other banner ad sizes that are also vertical in nature. Skyscrapers ads, for instance, are significantly taller than wide, but they have their own specific name.

VLOG- A blog that publishes video content; a video blog. Vlogs surged in popularity with the advent of broadband (a.k.a. high-speed) internet, which allowed real-time viewing of video content.

VOLUNTEER DIRECTORY- A Web directory staffed primarily by unpaid volunteer editors.

W

WEB 2.0 - A term often used to describe the ongoing technological change on websites that provide high-technology web-based applications to end users. Web 2.0 websites are generally sites where visitors are able to submit and control content. An example of Web 2.0 site is YouTube.com.

WEB BROWSER- A software application that allows for the browsing of the World Wide Web. Eg: Internet explorer, Mozilla Firefox etc

WEB DESIGN- The selection and coordination of available components to create the layout and structure of a Web page.

Web design has a significant impact on Web marketing efforts. Factors like how visitors find the site (search engine optimization), how long visitors use the site (site stickiness), how likely visitors are to return (repeat visitors) and how often visitors buy or register (conversion rate).

WEB DIRECTORY- Organized, categorized listings of Web sites.

The terms "Web directory" and "search engine" are often used interchangeably. Web directories are organized Web site listings put together by human reviewers, whereas search engine listings are put together by automated systems and lack a navigable structure. Much of the confusion stems from the various hybrid models that have developed over time, as search engines have incorporated directory features to assist with

WEB RING- A means for navigating a group of related sites primarily by going forward and backward.

Web rings are large-scale grassroots phenomena made up primarily of small/midsize sites.

The number of web rings and member sites runs into the millions.

WEB SITE TRAFFIC- The amount of visitors and visits a Web site receives.

Web site traffic was initially viewed as an all-important metric for gauging success on the Web. Now profitability is the focus, and Web site traffic is only part of the equation.

Web site traffic x conversion = results

Web site traffic is still important, as you can't have conversions without visitors, but it is becoming less important as a standalone metric.

WHOIS- A website that enables you to find out who the owner of a domain is, where it is hosted, and contact information of the owner.

<http://www.networksolutions.com/whois/index.jsp>

WORD-OF-MOUTH MARKETING- A marketing method that relies on casual social interactions to promote a product. A person is more likely to believe something that comes from a person that he knows or respects, instead of a canned source like commercials and print ads.

WORDPRESS- A popular website and script that is used for blogging. This website is different from others as it enables you to make posts as well as add pages to your blog. You can download Wordpress here: <http://www.wordpress.org> Weaver II is an excellent theme.

WSO- Warrior Special Offer- If you are a member of WarriorForum (<http://www.WarriorForum.com/forum>), you can offer other members a special price for a product or service you are selling and this is known as WSO. You need to be a member of the War Room plus pay \$40 per listing, and additionally the special price you are offering has to be only for members of WarriorForum and not to the public.
